About Us

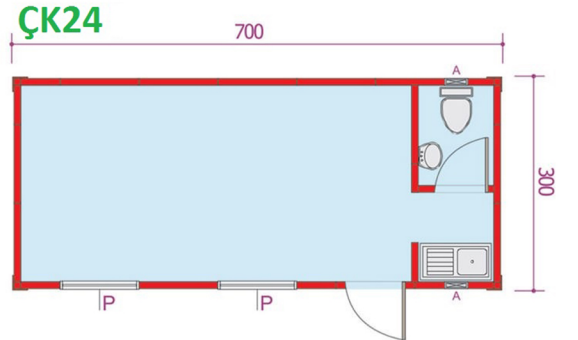

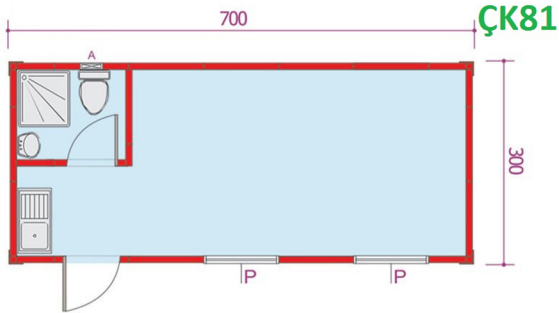

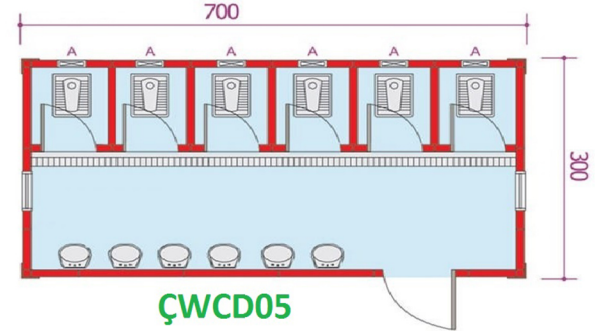

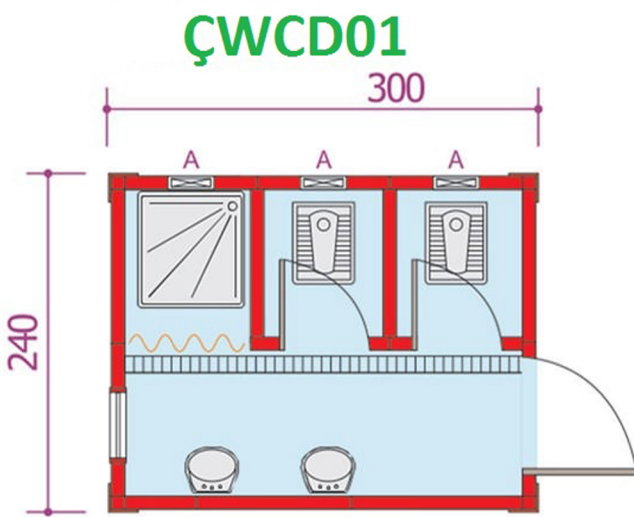

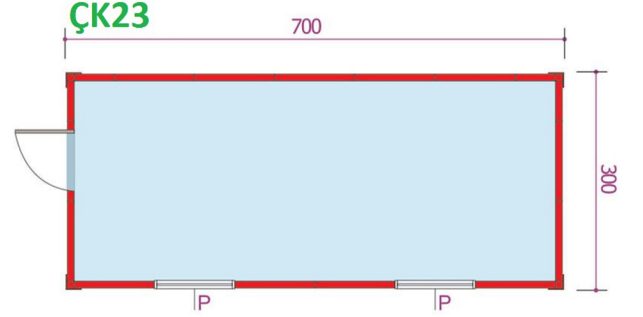

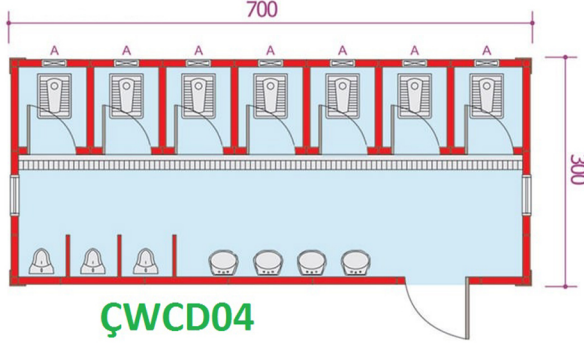

As Pratik Fabrika Steel Structure Systems, we offer durable, economical, and fast solutions by combining modern construction technologies with an innovative engineering approach. With our expert team in prefabricated and steel structure systems, we build safe, sustainable, and long-lasting structures.

Since our establishment, we have adopted quality, reliability, and customer satisfaction as our fundamental principles. We meticulously manage all steps from the design phase to production, assembly, and turnkey delivery; developing customized solutions for each project.
